

# A European cloud computing partnership. Big science teams up with big business.

## Strategic Plan:

- Establish Multi-tenant, Multi-provider Cloud Infrastructure
- Identify and adopt policies for trust, security and privacy
- Create governance structure
- Define funding schemes

To support the computing capacity needs for the ATLAS experiment.

Setting up a new service to simplify analysis of large genomes, for a deeper insight into evolution & biodiversity.

To create an Earth observation platform focusing on earthquake and volcano research.
